EXPERIENCE

Research Assistant Security Engineering for Future Computing (SEFCOM) Lab, ASU <i>Lab Directors:</i> Gail-Joon Ahn, Adam Doupé <i>Sponsors:</i> Department of Energy, National Science Foundation <ul style="list-style-type: none">· Recipient of the Department of Defense Information Assurance Scholarship Program (IASP) from 2012–2016 (4 school years).· Researched forensic techniques for Chrome OS/Chromium OS by creating tools in Python and using libvirt to interface with a KVM/QEMU hypervisor. (In progress)· Developed a web email forensic acquisition approach that reestablishes persistent cookie sessions stored by a browser, and automated the process using Python and Selenium.· Designed and implemented the core components of a modular, highly scalable, collaboration-centric digital forensic framework built on the OpenStack cloud architecture. Functions of the components included distributed job scheduling, storage management, and concise evidence representation and transmission.	Nov 2009 – Present Tempe, AZ
