EXPERIENCE

Research Assistant *Nov 2009 – Present*
Security Engineering for Future Computing (SEFCOM) Lab, ASU Tempe, AZ
Advisor: Prof. Gail-Joon Ahn   *Sponsors*: Department of Energy and National Science Foundation

- Recipient of the Department of Defense Information Assurance Scholarship Program (IASP) for the 2012–2013, 2013–2014, and 2014–2015 school years.
- Researched forensic techniques for **Chrome OS/Chromium OS** by creating tools in **Python** and using **libvirt** to interface with **KVM/QEMU**. (Project in progress.)
- Developed a web email acquisition approach that reestablishes persistent cookie sessions stored by a browser, and automated the process using **Python** and **Selenium**.
- Designed and implemented the core components of a modular, highly scalable, collaboration-centric digital forensic framework built on the **OpenStack** cloud architecture. Functions of the components included distributed job scheduling, storage management, and concise evidence representation and transmission.
- Set up and maintained an **OpenVPN** installation for the SEFCOM lab.

US Army Fort Meade, MD

- Summer internships in connection with DoD IASP scholarship.

Graduate Student Summer Intern　　　　　　　　　　　　　　　　　　　　　　*May 2011 – Jul 2011*
Sandia National Laboratories　　　　　　　　　　　　　　　　　　　　　　　　Albuquerque, NM

- Helped design a dynamic malware analysis framework built on **OpenStack**, allowing incident responders to define customizable analysis environments and use arbitrary analysis tools in triage or manual analysis mode.
- Wrote **Python** scripts to automate the setup process for using a SheevaPlug computer as a wireless intrusion detection agent running **Kismet**.
